Thanks Christina!

On the subject of wikis, do you know the status of the Lower Gallatin website? I helped Lisa with some of the sediment stuff and it sounded like she had her part pretty much wrapped up before she took leave. Do you know if those sections are getting posted online soon as a stakeholder review draft or was the plan to wait for Christian's part? Also, the TMDL document page of the Lwr Gallatin still has Pete Schade listed as the nutrient contact person.

Hey Peter – I just posted the document.
Yeah, the weather wasn't all that great here either, but I hope you had a good weekend despite it!

Hi Christina:

I just sent you the updated Judiths document on MT Epass with correct page #'s that should now be ready for the wiki.

Thanks for the BBQ invite. Got back from Yellowstone late yesterday after a soggy weekend of rain/sleet/snow so couldn't make it.
